

SOMTHIN ELSE

BIOLOGICAL SOFT LIQUID DETERGENT - NEUTRAL pH

BENEFITS

EXTREMELY SAFE AND GENTLE	Kind to the skin, as it is formulated to meet the highest standards of gentleness. It will keep the hands soft and is completely safe for personal and household use. Includes gentle surfactants and contains no harsh alkalis or other harmful components.
ATTACKS HARD JOBS WITH A SOFT TOUCH	Cuts through grease and leaves no scum. Suitable for use in hard water areas. Provides long-lasting foaming action. Sheet rinses, inhibits scum.
VERSATILE AND CONCENTRATED	The extremely active emulsifying power of the product is highly effective even when it is diluted. A unique and unsurpassable product, with multiple uses.
ECONOMY FACTOR	Based on 500 ml Concentrate Diluted 1:5 yields 2.5 Litres.

HOW TO USE

Dilute with water in the Dispenser bottle from 1:5 (normal working solution) or dependant on preference of strength required. For cleaning cars and vegetables 1:40.

TYPICAL USES

- Dishes and glasses - sheet rinses
- Cleaning vinyl floors
- Washing delicate underwear - lowers static
- Barrier for the hands when gardening or working on motor cars (concentrated)
- Rinsing salads and vegetables – rinse well
- Effective for removing stains on synthetic fabrics
- Will complement the NaturCare Bath Products
- Animal Shampoo
- Bubble Bath - leaves no ring around the bath
- With SWIPE-O-CIDE added inhibits gynaecological problems
- Softens water in hard water areas (e.g. add a few drops to washing machine or shaving water)
- Bathing in SOMTHIN ELSE for skin infections (e.g. Chicken Pox or Measles and add SWIPE-O-CIDE)

Washing fruit and vegetables does little to remove pesticide residues, according to the British Consumer Association. Peeling of fruits and vegetables depletes their nutritional value by up to 90 percent. - Daily Mail
Don't peel away vital Vitamins - simply wash them in diluted SOMTHIN ELSE!

TO DEMONSTRATE

SAFETY - Stress that it is completely safe for washing salads. Put some parsley into a small bottle, squirt with SOMTHIN ELSE, fill the bottle with water and shake. See how sand and aphids are dislodged. (Because commercially grown vegetables are often sprayed with water-repellent insecticides, water alone will not remove the aphids).

HOW IT EMULSIFIES Grease and food fats – Add a few drops of cooking oil to a glass of water. Squirt a little SOMTHIN ELSE and see how the oil dissolves.

MAIN ACTIVE INGREDIENTS

SUPERIOR EMULSIFIERS

Effective even in hard water, although it might be necessary to use a slightly stronger solution.

BIODEGRADABLE

When diluted, safe in septic tanks.

SURFACE-ACTIVE AGENTS

Cuts through and dissolves fats.

FOAM STABILISERS

For better penetration and releasing of dirt, oil and fats – even when cooking oils and fats are present the foam is retained and surface tension reduced. Somthin Else will enhance any of the NaturCare bathing products.
