

SWIPE BRITE

BIODEGRADABLE MULTI-PURPOSE HOUSEHOLD CLEANER - ACIDIC pH

BENEFITS

REMOVES HARD-WATER CALCIUM DEPOSITS ON BATHS, TOILETS, WINDOWS AND COASTAL DEPOSITS	Reacts chemically and effectively to remove these deposits. Biodegradable, it is safe to use in Septic Tanks when diluted.
CLEANS BADLY OXIDISED METAL SURFACES AND BUILD-UP ON CERAMICS	Will dissolve oxidation, eg rust
WILL REMOVE FATTY AND FRUIT STAINS FROM TEXTILES AND WOOLLEN CARPETS	The Triple Ether cleaning compounds and AHA's (Alpha Hydroxy Acids) are very effective in the removal of all acid-based stains.
ECONOMY FACTOR	Based on 500 ml Concentrate - Light 50 L, Medium 12 L, Heavy 2,5 L

HOW TO USE

This highly concentrated Product is activated by the addition of water. For bad rust or discolourisation, soak, agitate, and use a fine scouring pad. When rust is removed, rinse well and coat with a suitable oil. Dilute in 500 ml bottle as follows for LIGHT, MEDIUM and HEAVY Solutions:

LIGHT SOLUTION - 5 ml 100 Dispenser Bottles	For cleaning sinks, hand basins, ceramic tiles, cupboard surfaces, baths, carpets, textiles, jewellery. For use in Industrial carpet-cleaning machines, dilute 1:200.
MEDIUM SOLUTION - 20 ml 25 Dispenser Bottles	Light stains, rust, garden furniture, tools, coffee machines, vases, copper and brass (not when plated), burnt cast iron pots, cleaning mildew off patios.
HEAVY SOLUTION - 100 ml 5 Dispenser Bottles	Removal of rust, heavy deposits on baths, toilets, sinks, pots, pans, pipes, concrete surfaces, fatty areas around braais.

TYPICAL USES

BATHROOM	Ceramic Tiles Basins, Baths	Floor Tiles Toilet	Wash Basin surrounds Clogged Shower-heads
KITCHEN	Tiles Kettles	Rusty Utensils Brass and Copper (not plated)	Cast Iron & Stainless Steel Pots and Cutlery, Baking Trays
GARAGE	Garage Floor	Rusty Tools	Preparation of surfaces for brazing and soldering
GARDEN	Patio Floor Braai Areas	Removing Mildew Swimming Pool Tiles	Copper Taps and Fittings Rusty Garden Tools

TO DEMONSTRATE

Immerse a copper coin in SWIPE BRITE for a few seconds, or boil a scaled Kettle, adding some Medium Solution. The result is dramatic.

PRODUCT INFORMATION

In hard-water areas, the mixture of Calcium and Magnesium Carbonate builds up, and causes oxidation and discolourisation. SWIPE BRITE reacts chemically on such stains to remove these deposits and inhibit corrosion. It will dissolve certain greases.

CAUTION

Test all surfaces before use. It is advisable to use rubber gloves. Do not use on enamelled surfaces, re-coated or vinyl coated baths, acrylic baths, painted surfaces, new ovens, plated items or bi-metallic objects (two dissimilar metals). Do not mix with SWIPE or any other Alkaline Products. If swallowed, or in eyes, use egg white, milk or a solution of Bicarb to neutralise, followed by a copious application of water.
