

SWIPE-O-CIDE

EXTREMELY EFFECTIVE BROAD SPECTRUM DISINFECTANT

BENEFITS

DISINFECTS	It contains a broad-spectrum bactericide and fungicide which is used in both oral and topical pharmaceuticals, and will destroy numerous Gram-positive and Gram-negative bacteria, yeasts and moulds.
CLEANS	It has an Amphoteric surfactant, which assists with cleaning and penetration and allows the product to be used in an Alkaline, Acid or Neutral medium. Therefore, it can be used on its own or mixed with any of the HomCare cleaning Products. Floors, toilets, baths and other household surfaces can be cleaned and disinfected in one operation.
EFFECTIVE	When used on surfaces, including laboratories and implements, it destroys micro-bacteria.
VERSATILE	This unique versatile disinfectant has no direct competition. It stands alone in its field. It is completely safe to use in every area in the home, as well as in skin contact. Not for internal use.
FRAGRANCE	It has a very fresh and pleasant fragrance without being pervasive.
ECONOMY FACTOR	One 500ml of Concentrate will make 25 litres of active working solution.

HOW TO USE

- Dilute 10 ml preferably with boiled water that has been cooled, or sterile water, into a 500 ml dispenser bottle. Apply the diluted solution to the required surfaces and leave for a few minutes before wiping with a clean cloth. For toilets, do not flush immediately.
- For outdoor surfaces - drains, garbage, pet areas, etc. - spray the diluted solution and leave to dry. It is not necessary to wipe after each application. Repeat at least once per week.
- For stubborn stains, add 10 ml of SWIPE O CIDE to a medium solution of SWIPE and follow normal cleaning instructions. Also effective when used in combination with SOMTHIN ELSE or SWIPE BRITE.
- For soaking nappies or soiled linen, add 25 ml of diluted solution per 5 Litres of water.
- For minor grazes and scratches, spray on the diluted solution and swab the affected area lightly.
- For a disinfecting bath, add 25 ml of diluted mixture directly to bath water.
- Note that SWIPE-O-CIDE is not stable for long periods in SWIPE or SWIPE BRITE. For maximum efficacy, prepare only enough for the present application.
- Store away from heat and UV light, which will destroy the effectiveness of the product.

SOME TYPICAL HOUSEHOLD AND COMMERCIAL USES	SOME OF THE ORGANISMS TESTED & DESTROYED WITH A DILUTED SOLUTION OF SWIPE-O-CIDE	
Spraying toilets and wiping toilet floors Cleaning baths, hand basins and showers Kitchen fridges and deep freezers All kitchen working surfaces and floors Spray on sinks after washing up Car interiors, vinyl and upholstery Areas where animals sleep and feed Drains and surrounding areas Spray into dishwashing machines Soaking nappies and cleaning nursery furniture Wiping down laboratory surfaces, hospital floors, kitchens Restaurant tables, floors and surfaces Butcheries and fisheries Mix with SOMTHIN ELSE when shampooing animals Spray shower walls regularly to prevent fungus growth Use for shingles, cradle cap, toe fungi and chicken pox For skin abrasions, spray on before applying anything Use for soaking tea towels, toothbrushes, etc. Add to SOMTHIN ELSE in dispenser for hygienic hands	Aspergillus niger Bacillus cereus Bacillus subtilis Candida albicans Corynebacterium pyogenes Corynebacterium ulcerans Enterobacter aerogenes Escherichia coli Klebsiella aerogenes Klebsiella pneumoniae Microsporium canis Pityrosporium ovale Proteus inconstans Proteus mirabilis Proteus morgani Proteus rettgeri Proteus vulgaris Pseudomonas aeruginosa Pseudomonas cepacia	Pseudomonas fluorescens Pseudomonas putida Pseudomonas stutzeri Salmonella enteritidis Salmonella typhimurium Serratia marcescens Shigella flexneri Shingella sonnei Staphylococcus epidermidis Staphylococcus aureus Streptococcus pyogenes Streptococcus agalactiae Streptococcus dysgalactiae Streptococcus faecalis Streptococcus uberis Trychophyton rubrum Trychophyton tonsurans Trychophyton violaceum Trychophyton viride
