

SWIPE

MULTI-PURPOSE HOUSEHOLD CLEANER - ALKALINE pH

BENEFITS

A MIRACLE CLEANER	A reputation that has been built up over many years for this highly effective product.
SAFE	In contrast to the well-documented hazards of many household cleaners, SWIPE is safe in the home.
ECONOMY FACTOR	Based on 500 ml Concentrate LIGHT solution - 50 Litres MEDIUM solution - 5 Litres HEAVY solution - 2.5 Litres

FOR THE EFFICIENT REMOVAL OF GREASE AND GRIME

HOW TO USE

This highly CONCENTRATED product is activated by the addition of water. There are three recommended solutions. Dilute in 500 ml bottle as follows for LIGHT, MEDIUM and HEAVY solutions. Always test on surfaces and fabrics for colourfastness.

LIGHT SOLUTION - 5 ml 100 Dispenser Bottles	For cleaning glass, mirrors, windows, stainless steel, jewellery, kitchen appliances. Fill the windscreen wiper reservoir. For hand-cleaning of carpets – spray on, and wipe clean with a dry cloth. For machine cleaning of carpets, use a 1:400 dilution.
MEDIUM SOLUTION - 50ml 10 Dispenser Bottles	For general cleaning - plastics, vinyl, fabrics, spot cleaning of carpets, walls, oil, grease, blood, ball point, shoe polish, microwaves, bottom of the iron, garden furniture. Spray on, and leave for ten seconds or more (depending upon the severity of the soil) then wipe clean. For stubborn marks, repeat the process, or leave overnight. This solution can also be used for spraying aphids in the garden and on pot plants.
HEAVY SOLUTION - 100 ml 5 Dispenser Bottles	For cleaning ovens, baths, braai grids, bad stains. Spraying stains before laundering. For engines and heavy oil deposits. Do not spray on radiator or anodised parts.

TO DEMONSTRATE

MEDIUM SOLUTION

Mark a white handkerchief with a ball-point pen (first do a test). Swipe will remove most inks, but some have indelible ink. Put a few drops of old dirty oil (from a car engine) into a saucer. Spray and the oil will immediately break down, and will not reform. A very credible demonstration.

PRODUCT INFORMATION

- BIODEGRADABLE - It breaks down when exposed to bacteria. Safe in Septic Tanks.
- NON FLAMMABLE
- ALKALINE - The pH of diluted Swipe is 11,0 enabling it to penetrate and break down grease.
- STABLE - It has a shelf-life in excess of 5 years.
- SOLVENTS - It contains powerful Solvents and Surfactants. Solvents dissolve the majority of greases and alkaline stains. Surfactants emulsify and disperse the remaining oil and grease. Surfactants also reduce the surface tension of water so that the solution can penetrate. "The water becomes wetter"!
- CAUTION - Swipe can dry out the hands if used for long periods. It is advisable to use gloves.
